College Saving Initiatives

Faced with steadily rising college costs, the reduction of federal grants, and the difficulty of saving for tuition, families look to state government to offer plans that will ensure college opportunities for their children.

A special Rhode Island legislative commission prepared a comprehensive report that projects tuition costs in line with the scale of family income required. After reviewing public policy and examining the range of student aid programs available, the commission recommended the programs that would be realistic and workable for the different levels of family income. General Treasurer Begin will review this interesting report and explain the tuition plans/recommendations that represent a fresh approach to the current problem of financing higher education.

The lecture will be held on Saturday, April 16, from 2:30 to 3:30 p.m., at Salve Regina College in the O'Hare Academic Center.
