Proposal for a revised major in Global Business and Economics

GLOBAL BUSINESS AND ECONOMICS (BA)

Background: The recent merger of the Economics and Business Studies departments provides a unique opportunity to create a new major in Global Business and Economics (BA) that will capitalize on faculty capabilities and the demand for graduates prepared to meet the needs of a rapidly changing global environment. The proposed major will incorporate existing courses from Business Studies – Economics offerings as well as selected courses from other departmental offerings. Market research indicates that a major of this type appeals to a significant number of potential students in the undergraduate pool.

Rationale: The proposal for the new major addresses the following issues:

- The Business Studies and Economics department currently offers a (BA) in Management and a (BA) in Economics. The proposal eliminates both of these majors and offers students the opportunity to earn a major that captures the strength of both programs and eliminates some duplication of effort.
- The students currently selecting the BA in Management or BA in Economics would be better prepared for the changing global environment by the proposed major in Global Business and Economics.
- The proposal will allow for better utilization of the capabilities of faculty in the Department of Business Studies and Economics, and incorporate opportunities provided by the Pell Center.
- The proposed major will address the needs of undergraduate students seeking educational experiences that prepare them for opportunities in a rapidly changing global environment and encourages study abroad and increased capabilities in modern languages.

Catalog Description

Coordinator: Dr. Harold Lawber

The Global Business and Economics program of study builds on the University's Liberal Arts core and the Business Studies – Economics core to provide a well rounded educational experience. Selected courses with direct applications to the global environment from Economics, Business and other programs enhance the program to prepare students for a wide range of diverse opportunities in the international sector. Students completing the major are encouraged to study abroad and take additional courses in modern languages.
