Critical Project: Multi-factor Authentication (MFA)

What is MFA?

Just like with your login to your financial institution, MFA through Microsoft Office 365, uses a secondary method to ensure that you are the ONE logging into your account.

The term "Multi" represents the methods you can use to authenticate: Text, Phone Call, Secondary Email, or Authenticator App

Using MFA will prevent the number of accounts compromised due to phishing scams.

Critical Project: Multi-factor Authentication (MFA)

- Who already uses MFA?
- When will changes occur?
- Who will receive MFA next?
