SALVE REGINA COLLEGE WORKSHOP  
WILL HELP TEACHERS TO CATCH UP  
THEIR STUDENTS IN THE MYSTERIES  
OF SPACE SCIENCE

The National Aeronautics

and Space Administration is sponsoring a two-week workshop in space science at Salve Regina College this summer. It will be held August 16-27, from 9 a.m. to 12 noon, in Mercy Hall on the campus of the College.

Lectures and demonstrations

will be given by a staff of four from NASA, under direction of Mr. Arthur Maynard, Space Science Lecturer from the Electronics Research Center of NASA in Cambridge, Massachusetts. There will be ample opportunity for private reading project work in the afternoons.

The Workshop is designed

to present the principles of space science in simple demonstration techniques that can be used in the classroom by elementary school teachers. Meteorology; space motion, guidance, distance; aeronautics; rocket vehicles; man in space--biological problems and space hazards; tools for space exploration, and lunar geography will be covered in the two-week period.

Because a parallel work-  
shop originally scheduled to be offered in Providence has been cancelled,  
added interest among elementary school teachers has been shown in the  
Salve workshop. There is no tuition fee and no academic credit for the  
workshop. While it does not start until August 16, immediate registration  
for the remaining available places is advised by the college authorities.
