Summary

Effective Environmental Change requires Action on two levels:

- Personal (Behavior, Choices)
- Policy (Infrastructure, Incentives)

Cost:Benefit Analysis needs to weigh short term costs against long term benefits

Summary

Personal (Behavior, Choices)

- ✓ How I get to the library?
- ✓ Do I really need to print this out?
- ✓ Where do I put my sandwich wrapper?
- ✓ Do I really need this ILL book?
- ✓ Do I need to take the elevator?
- ✓ What incentive will get the employees to the library and reduce the carbon footprint?
- ✓ What incentive will improve recycling efficiencies?

Summary

Policy (Infrastructure, Incentives)

- ✓ Heating systems: can they be more efficient?
- ✓ What will we replace the roof with?
- ✓ Can the heating, cooling, lighting be reduced and equally comfortable?
- ✓ Improved energy settings on computers, printers, copiers.
- ✓ Enroll the Library in the Greenstart Program?
- ✓ Swipe cards on elevators?
- ✓ E-rental of DVDs?
- ✓ Telecommuting options?
